

Second Edition

Medical Device Design

Innovation from concept to market

Peter Ogrodnik

Contents

Preface	xvii
Acknowledgements	xix
CHAPTER 1 Introduction	1
1.1 The medical devices world since 2012.....	1
1.1.1 What has changed since Edition 1	1
1.1.2 The internet of things and big data	2
1.1.3 The medical devices “police”	2
1.1.4 Essential definitions and how they have changed	3
1.2 What is design?	11
1.2.1 The design life cycle.....	14
1.3 Summary	15
References.....	16
CHAPTER 2 Classifying medical devices	17
2.1 Why classify?.....	17
2.2 Classification rules	18
2.2.1 Custom made devices.....	21
2.3 Classification case studies.....	23
2.3.1 EU classification	24
2.3.2 USA classification case study	28
2.3.3 Special cases	30
2.4 Further case studies	32
2.4.1 OTC joint support device.....	32
2.4.2 A device that can jump classification!.....	35
2.4.3 An In-vitro diagnostic device	36
2.5 Classification models	37
2.6 Classification and the design process	39
2.7 Classifying software	41
2.7.1 Software safety classification.....	43
2.7.2 Case Study.....	44
2.8 Impact of classification on conformity assessment.....	47
2.9 Summary	48
2.9.1 Homework	48
References.....	49
Websites for further information.....	49

CHAPTER 3	The design process	51
3.1	Design process v design control.....	51
3.2	Changes since the last edition.....	54
3.3	Design models.....	55
3.3.1	Pahl and Beitz, and Pugh.....	55
3.3.2	Divergent-convergent model.....	59
3.4	Managing design.....	64
3.4.1	Common design management models.....	64
3.5	Cross-reference with regulatory requirements.....	74
3.6	Summary.....	76
3.7	Tasks.....	77
	References.....	78
	Further reading.....	78
CHAPTER 4	Implementing design procedures	79
4.1	Introduction.....	79
4.2	Review of guidelines.....	80
4.3	Overall procedure.....	80
4.4	Audit/Review procedure.....	85
4.5	The design process.....	91
4.5.1	New product procedure.....	91
4.5.2	Clarification/product specification procedure.....	93
4.5.3	Detailed design procedure.....	95
4.5.4	Design verification/validation/evaluation procedure.....	96
4.5.5	Design changes.....	97
4.5.6	Control of documents.....	98
4.5.7	Risk assessment procedure.....	99
4.6	Implementing a procedure.....	100
4.7	Summary.....	101
	References.....	101
CHAPTER 5	Developing your product design specification	103
5.1	Introduction.....	103
5.1.1	Lining up the PDS with the new “risk” focused requirements.....	103
5.2	Developing the statement of need (or brief).....	104
5.2.1	Identifying the ‘one thing’.....	104
5.2.2	Formalising the statement of need.....	105
5.3	The product design specification (PDS).....	108
5.3.1	Essential elements of a PDS.....	109
5.3.2	Customer.....	110
5.3.3	Regulatory and statutory.....	112
5.3.4	Technical.....	113

5.3.5 Performance	114
5.3.6 Sales	117
5.3.7 Manufacturing.....	117
5.3.8 Packaging and transportation	119
5.3.9 Environmental.....	119
5.3.10 Summary	121
5.4 Finding, extracting and analysing the content.....	121
5.4.1 Focus groups	121
5.4.2 Regulatory bodies.....	123
5.4.3 Immersion.....	124
5.4.4 Libraries	124
5.4.5 Technical literature	127
5.4.6 The internet.....	127
5.4.7 Conferences and symposia	127
5.4.8 Others.....	128
5.5 Devices containing electronics or electrical power	135
5.6 Software.....	138
5.6.1 A word about mobile/cell phones and apps.....	139
5.6.2 Platforms	139
5.6.3 Operating systems.....	140
5.6.4 Embedded software.....	141
5.7 Summary	141
5.8 Homework	142
References.....	142
Further reading.....	142
CHAPTER 6 Generating ideas and concepts.....	143
6.1 Introduction.....	143
6.1.1 The ‘engineer’s notebook’.....	144
6.1.2 A number of phases.....	144
6.1.3 Creative space	147
6.1.4 Generating concepts/ideas.....	149
6.1.5 Selecting concepts and ideas	161
6.1.6 Risk Analysis	168
6.1.7 Summary	168
References.....	170
CHAPTER 7 Enhancing quality in design	173
7.1 Introduction	173
7.2 Why quality in design?	173
7.3 Optimization	174
7.4 2^k Factorial experiments/design of experiments	180

7.5	House of quality.....	190
7.6	Failure mode and effect analysis (FMEA).....	193
7.7	Fault tree analysis.....	207
7.8	Ishikawa diagram	211
7.9	D - 4 -X	212
7.10	Six sigma.....	212
7.11	End user input.....	214
7.12	Talk to your suppliers.....	214
7.13	A word about software development	214
7.14	Summary	215
	References.....	216

CHAPTER 8 Design realisation/detailed design..... 217

8.1	Introduction.....	217
8.2	The process to design realization.....	217
8.2.1	Macro project plan	218
8.2.2	Assemble design team.....	218
8.2.3	Micro-plan.....	218
8.2.4	Delivery of sub-projects	218
8.2.5	Delivery of overall design.....	219
8.2.6	How?	219
8.3	Assemble your detailed design team	219
8.3.1	DHF considerations for the “lead designer”	220
8.3.2	Phases of a team	221
8.3.3	Design meetings/design reviews.....	222
8.4	Design calculations.....	223
8.4.1	Computer aided analysis.....	225
8.4.2	Computer aided analysis disciplines	226
8.5	Materials selection.....	230
8.5.1	Formalising the selection process	230
8.5.2	PDS	231
8.5.3	Precedent	231
8.5.4	Research	231
8.5.5	Regulatory bodies.....	231
8.5.6	Standards	232
8.5.7	Materials search engines	233
8.5.8	Advisory bodies	236
8.5.9	Consultancies.....	236
8.5.10	Animal products.....	236
8.5.11	Biocompatibility.....	237

8.6	Computer aided design.....	239
8.6.1	Cloud computing.....	240
8.6.2	Document and revision management.....	241
8.6.3	Collaboration.....	241
8.6.4	Reverse engineering.....	242
8.6.5	Engineering drawings.....	243
8.6.6	Part numbering.....	243
8.6.7	Tolerances.....	246
8.6.8	Sign off.....	247
8.6.9	Rapid prototyping (RP).....	247
8.6.10	3D visualization.....	248
8.7	Component selection.....	250
8.8	D-4-X.....	251
8.8.1	Design for manufacture (DFM).....	252
8.8.2	Design for assembly (DFA).....	256
8.8.3	Design for disassembly (DFDA).....	258
8.8.4	Design for sterilization (DFS).....	259
8.8.5	Design for environment/sustainability (DFE).....	262
8.8.6	Design for usability (DFU).....	268
8.8.7	Design for desirability.....	280
8.8.8	Design for connectivity.....	280
8.9	Summary.....	284
	References.....	284
CHAPTER 9 Risk management, risk analysis and ISO 14971....		287
9.1	Introduction.....	287
9.2	Risk management.....	288
9.3	Risk analysis.....	290
9.4	Identifying risks/hazards.....	291
9.5	Assessing level of risk.....	298
9.5.1	Other ways of assessing risk.....	305
9.6	Risk management procedure document.....	307
9.7	Risk management folder in the technical file.....	309
9.8	Risk management and internal procedures.....	310
9.8.1	Risk management and the company's risk register.....	313
9.9	Software.....	314
9.10	Standards, courses and certification.....	315
9.10.1	A copy of the standard?.....	315
9.10.2	Courses and certification.....	316
9.11	Summary.....	316
	References.....	316

CHAPTER 10	Evaluation (validation and verification)	317
10.1	Introduction.....	317
10.2	Reporting of evaluations.....	318
10.2.1	Criteria based evaluation.....	318
10.2.2	Independence.....	319
10.2.3	Qualifications.....	319
10.2.4	Repeatability and reproducibility.....	320
10.2.5	Cross-correlation.....	320
10.2.6	Report format.....	320
10.3	<i>In-Vitro</i> evaluations.....	322
10.3.1	Accelerated life tests.....	322
10.3.2	Cleaning and sterilisation.....	326
10.3.3	Calibration.....	328
10.3.4	Surface/shape/dimension evaluation.....	335
10.3.5	Tests associated with electrical safety.....	340
10.3.6	Literature review.....	341
10.4	<i>In silico</i>	345
10.4.1	Animation and virtual reality.....	345
10.4.2	Dynamic simulation.....	346
10.4.3	Finite element analysis (FEA).....	347
10.4.4	Computational fluid dynamics (CFD).....	347
10.4.5	Software error checking.....	347
10.4.6	Caveat.....	348
10.5	<i>In-vivo</i>	348
10.5.1	Clinical study, clinical trial or clinical evaluation: what is the difference?.....	348
10.5.2	Why conduct a clinical study?.....	350
10.5.3	Structure of clinical studies.....	350
10.5.4	Analysis of data.....	360
10.6	Presenting the outcomes of your evaluation.....	367
10.7	Value to 'healthcare' analysis.....	368
10.7.1	Distinct health benefits.....	368
10.7.2	Length of service/life.....	370
10.7.3	Having the ability to state clinical benefits.....	372
10.8	Summary.....	374
	References.....	375
CHAPTER 11	Manufacturing supply chain	377
11.1	Introduction.....	377
11.2	Identifying potential suppliers.....	377
11.2.1	Samples.....	379

11.2.2	Initial audit	379
11.2.3	Contractual arrangements	380
11.2.4	Approved supplier register	381
11.2.5	Suggested procedure for supplier approval.....	383
11.3	Packaging.....	383
11.3.1	Sterile packaging	383
11.3.2	Non-sterile packaging.....	386
11.3.3	Packaging testing.....	387
11.3.4	Storage considerations	389
11.4	Procurement.....	390
11.4.1	Supply chain glossary.....	390
11.4.2	Costing	391
11.4.3	Manufacturing changes.....	391
11.5	Summary.....	392
	Further reading.....	392
CHAPTER 12	Labeling and instructions for use.....	393
12.1	Introduction.....	393
12.1.1	The rules	393
12.2	Standard symbols and texts	394
12.2.1	CE 1 mark.....	394
12.2.2	Non-sterile device.....	396
12.2.3	Single use item.....	396
12.2.4	Sterility.....	396
12.2.5	Use by date.....	397
12.2.6	Lot number/batch number.....	397
12.2.7	Catalog number r/part number.....	398
12.2.8	Consult instructions for use	398
12.2.9	Prescription only.....	399
12.2.10	Manufacturer details.....	399
12.2.11	Date of packing/manufacture date.....	399
12.2.12	EC representative.....	400
12.3	Labeling.....	400
12.3.1	Outer packaging labels.....	401
12.3.2	Patient labels.....	401
12.3.3	Bar codes	401
12.3.4	Security labels.....	405
12.3.5	Cross-over of symbols between USA and EC	405
12.3.6	Translation.....	406
12.3.7	Position of labels	406

12.4	Marking.....	406
12.4.1	Company identification mark.....	406
12.4.2	CE mark.....	406
12.4.3	Part number and lot number.....	407
12.4.4	Size.....	407
12.5	IFUs and surgical techniques.....	408
12.5.1	Instructions for use leaflet.....	408
12.6	Surgical technique.....	409
12.6.1	Assembly and disassembly instructions.....	409
12.6.2	Warnings and contraindications.....	410
12.6.3	Production of the surgical technique.....	411
12.6.4	Document control.....	411
12.7	Declarations.....	411
12.7.1	Declaration of conformity.....	411
12.7.2	Declaration of classification.....	412
12.7.3	Declaration (or certificate) of cleaning and sterilisation.....	413
12.8	Translation.....	413
12.9	Software and items with electrical power.....	414
12.10	Summary.....	416
	References.....	416
CHAPTER 13	Post market surveillance.....	417
13.1	Introduction.....	417
13.2	PMS and its role in design.....	418
13.3	Tools.....	420
13.3.1	Process control chart.....	420
13.3.2	Reliability – bath tub curve.....	421
13.3.3	Weibull plot.....	423
13.3.4	Kaplan-meyer plots.....	425
13.3.5	Measles chart.....	426
13.3.6	Pareto analysis.....	427
13.4	Using your existing contacts.....	427
13.4.1	Early adopters and key opinion leaders.....	428
13.4.2	Focus groups.....	429
13.4.3	Courses and conferences.....	429
13.5	Vigilance.....	430
13.6	The good, the bad, and the ugly.....	430
13.7	Summary.....	431
	References.....	431

CHAPTER 14	Protecting your IP	433
14.1	Introduction.....	433
14.2	Types of IP protection.....	434
14.2.1	Patent.....	434
14.2.2	Registered design (design patent)	439
14.3	Keeping mum.....	439
14.4	Talking with partners	441
14.5	Summary	441
	References.....	442
CHAPTER 15	Obtaining regulatory approval to market	443
15.1	Introduction.....	443
15.2	Class I devices.....	443
15.2.1	EU application.....	443
15.2.2	FDA registration.....	447
15.3	Higher classifications	449
15.4	FDA process.....	449
15.4.1	Substantial equivalence (SE).....	453
15.4.2	Other sections.....	454
15.4.3	Process	454
15.4.4	Effect on IP.....	455
15.5	EU process.....	455
15.5.1	Advice.....	455
15.5.2	Documentation.....	456
15.5.3	Technical files (DHF).....	457
15.5.4	Standards	459
15.5.5	Stock control	460
15.5.6	Advice.....	460
15.5.7	The outcome.....	460
15.6	Getting to market	460
15.6.1	Unique selling points (USP).....	461
15.6.2	Key opinion leaders (KOLs).....	461
15.6.3	Independent studies.....	461
15.6.4	Health economics	462
15.6.5	Insurance	462
15.7	Summary	462
	References.....	463
	Appendix A. Useful websites.....	465
	Appendix B. Tables.....	469
	Appendix C. ISO 14971 Annex C pre-risk analysis questionnaire.....	471

Appendix D. Generic codes for class I medical devices (MHRA).....487

Appendix E493

E.1 Basic materials properties for materials selection493

 E.1.1 Density493

 E.1.2 Stress and strain.....493

Appendix F. Further worked examples of a PDS497

Index.....511
