

World Scientific Series on Carbon Nanoscience

# HANDBOOK OF CARBON NANO MATERIALS

Volume 7  
Synthetic Developments of  
Graphene and Nanotubes

Editors

Francis D'Souza  
Karl M. Kadish

# Contents

<i>Preface</i> .....	ix
<i>List of Contributors</i> .....	xiii
<b>Chapter 1 Graphene Synthesis and Applications</b> .....	<b>1</b>
<i>Nitin Choudhary, Wonbong Choi</i>	
1. Introduction .....	1
2. Graphene Properties .....	3
2.1. Mechanical properties .....	4
2.2. Electrical properties .....	8
2.3. Thermal properties.....	10
2.4. Optical properties .....	13
3. Synthesis of Graphene.....	15
3.1. Exfoliation and cleavage.....	15
3.2. Thermal chemical vapor deposition techniques.....	17
3.3. Plasma enhanced chemical vapor deposition techniques.....	19
3.4. Other processing routes .....	20
3.4.1 Chemical methods.....	20
3.4.2 Thermal decomposition of SiC.....	21
3.4.3 Un-zipping CNTs and other methods .....	23
4. Applications .....	24
4.1. Electronics.....	24
4.2. Gas and bio sensors.....	26
4.3. Transparent electrodes .....	29
4.4. Energy: Battery and solar cells.....	31
4.5. Field emission .....	35
4.6. Others (composites).....	37
Conclusions .....	39
References .....	40

<b>Chapter 2 Synthesis and Characterization of Carbon Nanotube.....</b>	<b>51</b>
<i>Satoshi Yasuda and Kei Murakoshi</i>	
1. Introduction .....	51
2. Carbon nanotube synthesis .....	53
2.1. Chemical vapor deposition technique .....	53
2.2. Electrochemical deposition technique .....	60
3. Characterization of SWNT at atomic scale .....	67
3.1. Electrochemical scanning tunneling microscopy .....	67
3.2. Surface-enhanced Raman scattering measurement .....	73
Conclusions .....	84
Acknowledgements .....	84
References .....	85
<b>Chapter 3 Synthesis of Multifunctional Carbon Nanostructures.....</b>	<b>89</b>
<i>Huige Wei, Yiran Wang, Jiang Guo, Bin Qiu, Daowei Ding, Suying Wei, Evan K. Wujcik, Zhanhu Guo</i>	
1. Introduction .....	89
2. Self-Assembled MCNs .....	92
3. Hydrothermal Synthesis Routes to MCNs.....	96
4. Pyrolysis for carbon based nanocomposites .....	102
5. Other Methods of MCN Synthesis.....	114
6. Future Outlook and Prospective .....	122
References .....	124
<b>Chapter 4 CVD of Carbon Nanomaterials: From Graphene Sheets to Graphene Quantum Dots.....</b>	<b>127</b>
<i>Roberto Muñoz, Mar García-Hernández and Cristina Gómez-Alexandre</i>	
1. Introduction .....	127
2. Recommended nomenclature for 2D graphene .....	130
3. Fundamental properties of two dimensional graphene materials .....	132
3.1 Crystal structure .....	132
3.2. Band structure and electronic properties .....	136
3.2.1. Electronic band structure of graphene.....	136
3.2.2. Electronic properties .....	141

3.3. Thermal properties of graphene .....	143
3.4. Optical properties .....	146
3.5. Mechanical properties .....	148
3.6. Chemistry of graphene.....	149
3.6.1 Covalent functionalization.....	151
3.6.2. Non-covalent interactions.....	155
4. CVD Technologies and Methods for Graphene Growth.....	156
4.1. Catalytic Thermal Activated CVD-Graphene (CCVD) .....	159
4.1.1. Reaction Mechanism in Graphene Growth by CCVD.....	161
4.2. Plasma Enhanced CVD-Graphene (PECVD) .....	163
4.2.1. Effect of the Plasma in the Graphene growth .....	166
Acknowledgments.....	172
References .....	172

**Chapter 5 Single-walled Carbon Nanotubes: Synthesis  
and Modification of the Electronic Structure .....186**  
*Marianna V. Kharlamova*

1. Introduction .....	186
2. Synthesis of Single-walled Carbon Nanotubes .....	187
2.1. Arc-discharge method .....	187
2.2. Laser ablation method.....	190
2.3. Chemical vapor deposition method .....	191
2.3.1. CVD using hydrocarbons as carbon source.....	192
2.3.2. Catalytic decomposition of CO at high pressure .....	193
2.3.3. Decomposition of CO in the presence of catalyst .....	193
2.3.4. CVD using alcohols as carbon source .....	193
2.3.5. Plasma-enhanced CVD.....	194
3. Methods of Controlling the Electronic Structure of SWCNTs .....	195
3.1. Synthesis of SWCNTs with defined electronic structure.....	196
3.2. Separation of SWCNTs .....	196
3.3. Modification of the electronic structure of SWCNTs.....	196
4. Overview of Methods of Modification of the Electronic Structure of SWCNTs.....	197
4.1. Intercalation of bundles of SWCNTs.....	197
4.2. Chemical modification of the outer surface of SWCNTs.....	197
4.3. Substitution of carbon atoms of SWCNT walls .....	198
4.4. Filling of internal channels of SWCNTs.....	199
5. Characterization of the Electronic Properties of Filled SWCNTs.....	200
5.1. Optical absorption spectroscopy.....	200

viii *Contents*

5.2. Raman spectroscopy.....	203
5.3. X-ray photoelectron spectroscopy.....	207
Conclusions.....	209
References .....	210
<i>Cumulative Index of Volumes 7 and 8.....</i>	<i>231</i>
